Bucaramanga, a city to be in love!

Ronald Andrew Verputten, a Dutch citizen and resident of Curaçao suffered a lung infection that led him to struggle between life and death. From Bucaramanga, and thanks to the logistic support of FCV's International Services Office, Dr. Leonardo Salazar and the FCV air ambulance crew arrived in Curaçao to assist Ronald, connecting him to the artificial respiration support (ECMO) and then moved to the Cardiovascular Institute of the FCV, where little by little Ronald's health was evolving satisfactorily.

My husband was on Ecmo for 1 month at FCV. We live in Curaçao. We don't speak Spanish and it was a very frightfull situation. But FCV gave us all the support on everything. Even more. Everybody, docters, nurses, international office, security and even the cleaners. Really everybody took care of us. They made us feel safe and they are our new family now 💎 They saved my husbands life and all those weeks I never felt alone. We own you a lot! Thank you so much. We can never pay you back! 💎

# A Center of Excellence in Healthcare

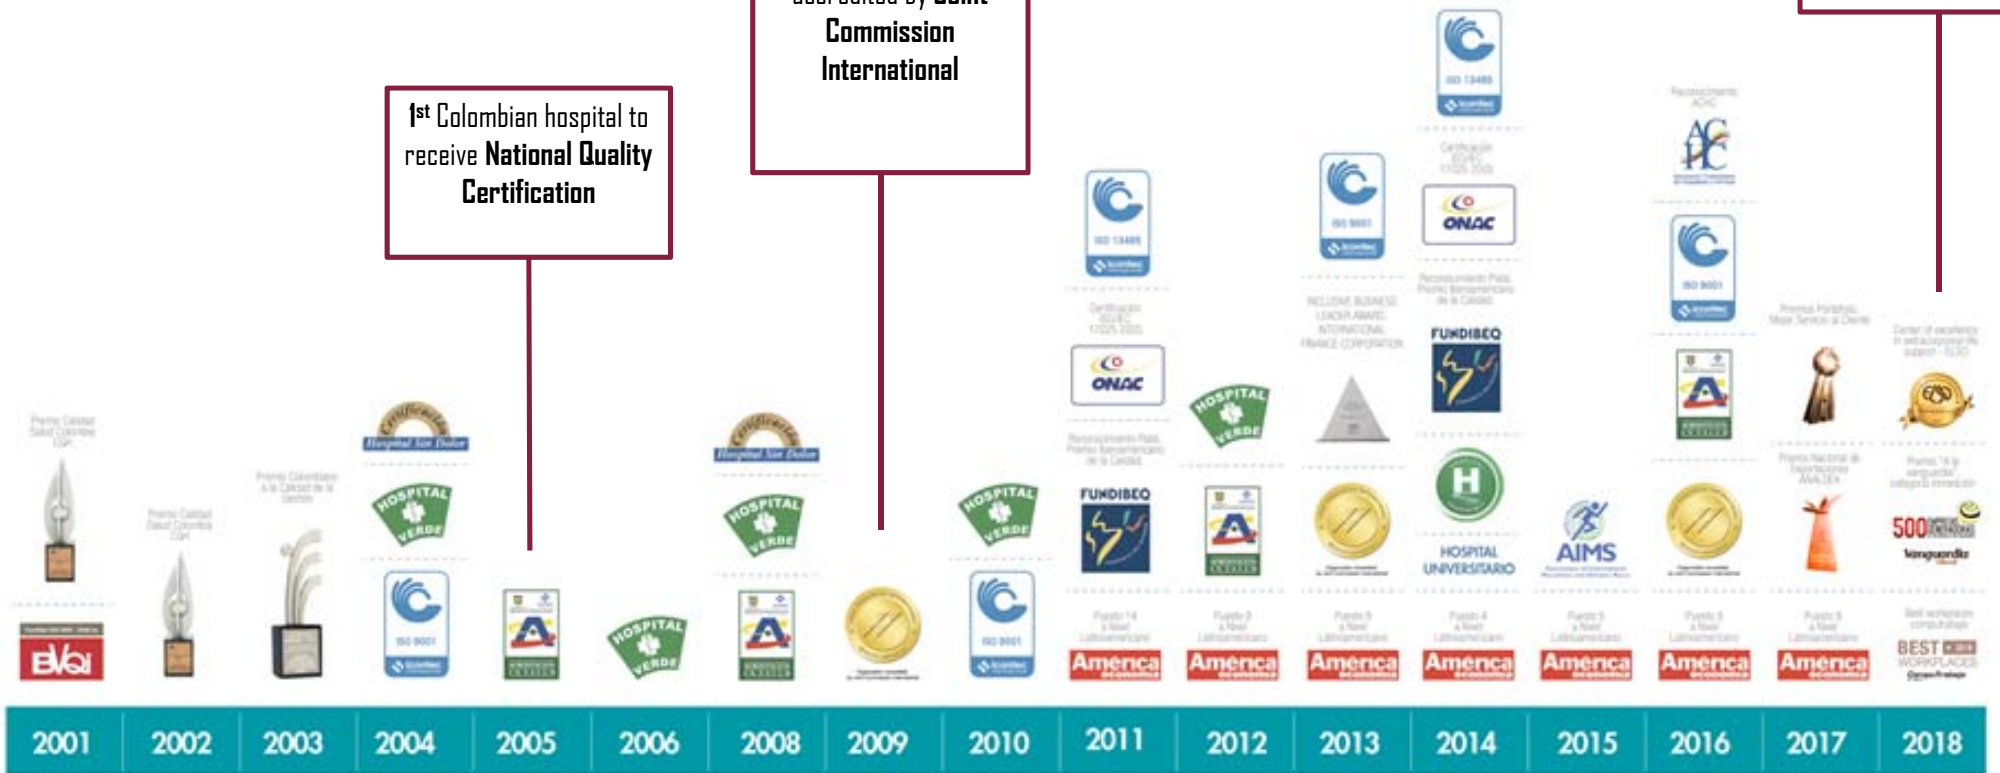

1<sup>st</sup> Artificial Heart Implant in Latin America.

1<sup>st</sup> Colombian hospital to receive **National Quality Certification**

1<sup>st</sup> Colombian Hospital accredited by **Joint Commission International**

An aerial night view of Bucaramanga, Colombia, showing a dense urban landscape illuminated by city lights. The sky is a mix of deep blue and orange, suggesting a sunset or sunrise. The city lights are a mix of yellow, white, and blue, with some buildings standing out. The overall scene is vibrant and captures the energy of the city at night.

**Bucaramanga enriches the experience of our  
visitors**

**We hope to welcome you soon**
